Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/069,867

Applicant(s)

WIRTZ ET AL.

Examiner

Ula C. Ruddock

Art Unit

1794

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 February 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 17-21, 23-27 and 29-33 is/are pending in the application.
- 4a) Of the above claim(s) 24-27 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 17-21, 23, 29-33 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SF/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 14, 2008, has been entered.
2. The Examiner has carefully considered Applicant's amendments and accompanying remarks filed February 14, 2008.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

4. Claims 17-21, 23, and 29-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pall et al. (US 3,327,866) in view of Buck (US 6,284,201). Pall et al. disclose a woven wire mesh for use in filters (col 1, ln 8-9). The wires are usually monofilaments, which are preferred for filter uses (col 4, ln 71-72). The filter media can be a depth filter (col 1, ln 50-52). The warp diameter is larger than the shoot (i.e. weft) diameter (Table 2). The wire mesh can be woven of wires of any metal, preferably stainless steel (col 4, ln 58-63). The wire mesh can be used as filters in single or multiple layers (col 5, ln 55-56). Pall et al. disclose the claimed invention except for the teaching that a plurality of metal fibers threads are worked in between the metal wires.

Buck (US 6,284,201) discloses a catalyst body which comprises a knitted fabric comprised of heat-resistant fibrous material (abstract). The catalyst body is used as the exhaust gas purification of motor vehicle engines (col 1, ln 19-20) and also acts as a filter for particulate pollutants (col 2, ln 53-55). The knitted fabric also comprises at least one metallic thread which can be worked into the knitted fabric which gives the knitted fabric additional dimensional stability and improved strength (col 2, ln 65-67 to col 3, ln 1; col 10, ln 42-50). It would have been obvious to one having ordinary skill in the art to have inserted Buck's metallic threads into the woven wire mesh of Pall et al., motivated by the desire to create a filter having additional dimensional stability and improved strength.

Regarding Applicant's limitations in claims 17, 29, and 30, it has been held that fiber diameter and fiber density are result effective variables. For example, the diameter of a fiber directly affects the strength of the fiber and fabric. The number of fibers in a thread directly affects the stability of the fabric. Therefore, it would have been obvious to one having ordinary skill in the art to have made the fibers have a diameter less than 100 μm or 30 μm , to have made the fiber thread have more than 100 fibers or 500 fibers, and to have made the metal fiber thread have a larger diameter than the metal wire, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F. 2d 272, 205 USPQ 215 (CCPA 1980). In the present invention, one would have optimized the fiber diameter and fiber density, motivated by the desire to create a mesh with the desired filtration properties.

Regarding claim 19, it would have been obvious to one having ordinary skill in the art to have made the metal wires constitute the warp and the metal fiber threads constitute the weft of the cloth, motivated by the desire to create dimensional stability in a desired direction.

Regarding the newly added limitation of a “support layer comprising a second plurality of metal wires,” it is the Examiner's position that because Pall's wire mesh can be properly equated to a first plurality of metal wires and a second plurality of metal wires, as required by claim 29.

Rejection is maintained.

Response to Arguments

5. Applicant's arguments filed February 14, 2008, have been fully considered but they are not persuasive for the reasons set forth. Applicant argues that neither Pall et al. nor Buck disclose a woven cloth having a weft and a warp that includes a first plurality of metal wires, a plurality of metal fiber threads worked in between the metal wires, and a support layer comprising a second plurality of metal wires. This argument is not persuasive because when combined, Pall et al. in view of Buck disclose a woven cloth having a weft and a warp that includes a first plurality of metal wires, a plurality of metal fiber threads worked in between the metal wires, and a support layer comprising a second plurality of metal wires. As shown above, Pall's wire mesh can be properly equated to both a first and second plurality of metal wires, since by its definition, a mesh has a first and second plurality of wires. Therefore, the rejection is maintained.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ula C. Ruddock whose telephone number is 571-272-1481. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
